Bekasi, Indonesia | +62 81384251480 | mhmdafrizahdyt06@gmail.com | www.linkedin.com/in/afriza

SUMMARY

A current sixth-semester student in the Information Technology program at Telkom University with an interest in technology development and problem-solving. Experienced in working on various academic projects and capable of working both independently and as part of a team. Possesses strong problem-solving skills, good time management, communication, and teamwork abilities, as well as a strong commitment to continuous learning and growth in the field of technology.

TECHNICAL SKILLS

Programming Languages (Go, Python, C/C++, Java) Tools (Git, Github, VS Code, Google Colab)
Web Development (HTML, CSS, Laravel/Flutter) Data & AI (Pandas, Numpy, Scikit-learn)
Database (MySQL, SQL) Basic Networking (Cisco Packet Tracer, TCP/IP)

SOFT SKILLS

Problem Solving	Communication Skills	Attention to Detail
Time Management	Adaptability	Willingness to Learn
Teamwork & Collaboration	Critical Thinking	

PROFESSIONAL EXPERIENCE

Logistics Officer SMA Negeri 2 Tambun Selatan	Des 2022 - Jan 2023
- Coordinated logistics requirements including sound systems, stage, lighting, and event equipment. - Managed coordination with vendors and equipment rental providers. - Oversaw the setup of stage, sound systems, and lighting to ensure operational readiness. - Ensured the safety of equipment and managed dismantling and return after the event.	

Operating Systems Lab Assistant Telkom University Jakarta	Feb 2026 - Present
- Assisted students in understanding operating system concepts such as process management, memory management, and file systems. - Guided and supervised lab sessions, ensuring students could complete practical tasks effectively. - Provided technical support and troubleshooting during lab activities (Linux environment, command line, etc.) - Evaluated and graded student assignments, reports, and practical exams.	

PROJECTS

Community Service Team Member – AI Education Program Telkom University Jakarta	Apr 2025 - May 2025
- Operated technical equipment to support AI education sessions. - Assisted in delivering interactive content on AI and digital privacy. - Contributed to project documentation and report preparation. - Collaborated with team to execute community outreach activities.	

UI/UX Designer – RTKu (RT/RW Digitalization App)	Apr 2025 - Sept 2025
---	-----------------------------

Telkom University Jakarta

- Designed a user-centered UI/UX prototype for a neighborhood administration application (RTKu) to improve efficiency and transparency in RT/RW services.
- Conducted user research through interviews and observations involving RT/RW administrators and residents across multiple cities.
- Developed wireframes and high-fidelity prototypes using Figma based on User-Centered Design (UCD) methodology.
- Achieved a System Usability Scale (SUS) score of 73.25, indicating good usability and user acceptance.

Machine Learning Project – Heart Disease Risk Classification
Telkom University Jakarta

May 2025 - Jun 2025

- Developed a machine learning model to classify heart disease risk using medical dataset.
- Applied supervised learning algorithms for prediction and analysis.
- Performed data preprocessing including data cleaning and feature selection.
- Evaluated model performance using appropriate metrics to ensure accuracy.

Linux File Permission Simulation
Telkom University Jakarta

Jun 2025 - Jun 2025

- Simulated multi-user file access control on Linux using chmod in Ubuntu 24.04 LTS.
- Creating and managing users to test file permissions for owners, groups, and other users.
- Analyzing the security implications of permission settings (600, 644, 744).
- Implementing Discretionary Access Control (DAC) and the principle of least privilege.

IoT Project – Smart Fish Feeder & Water Quality Monitoring System
Telkom University Jakarta

Sept 2025 - Jan 2026

- Developed an IoT-based system using ESP32 to automate fish feeding and monitor water quality in real-time
- Integrated multiple sensors (temperature, pH, ultrasonic) and actuators (servo motor) for automated system control
- Implemented real-time data transmission and remote monitoring using Blynk mobile application
- Designed system logic for scheduled and manual feeding, improving efficiency and reducing human error.

QA Tester & System Integration – AI Health Application
Telkom University Jakarta

Oct 2025 - Jan 2026

- Conducted functional testing on core features to ensure system reliability and performance.
- Performed debugging and resolved application errors to improve system stability.
- Validated accuracy of AI-based outputs related to symptom analysis.
- Collaborated with development team to ensure smooth integration of system components.

EDUCATION

Bachelor of Information Technology
Telkom University

Sep 2023 - Sep 2027

Mathematics and Natural Sciences
SMA Negeri 2 Tambun Selatan

Jul 2020 - April 2023

ADDITIONAL INFORMATION

- **Languages:** Indonesia, English
- **Certifications:** Python Fundamental for Data Science, Google Cloud Cybersecurity Certificate, Preparation Course for Azure AI Fundamentals (AI-900).
- **Activities:** Himpunan Mahasiswa Teknologi Informasi (HMIT), Google Developer Groups on Campus: Telkom University Jakarta.
